

GATBO[®]

**From Kitchen to Table,
Safe Storage Every Step of the Way.**

GATBO is committed to combining the craftsmanship of German technology with the practical needs of the catering industry to create plastic products that are versatile, practical and durable.

In the usage scenarios of food storage, preparation, delivery, enjoyment, and cleaning, GATBO provides a full range of solutions, so that every food service can be presented safely.

GATBO, Your Best Choice.

National Industrial Quality Benchmark

International Authoritative Guarantees

A quality management system standard formulated by the International Organization for Standardization (ISO)

Issued by NSF, an authoritative institution in the field of public health and safety, which has been adopted as the national standard by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC).

Third-party PFAS testing with compliance certification issued.

European Union certification. Products need to pass the testing and evaluation of the EU standardization body and obtain the relevant certificate before entering the European market.

A quality management system standard formulated by the International Organization for Standardization (ISO)

United States Food and Drug Administration, Products approved by the FDA are safe and effective for the human body

Hazard Analysis and Critical Control Point Management System Certification. The National Academy of Sciences and the WHO/FAO Committee on Nutrition Law agree that HACCP is the most effective management system for ensuring food safety

A quality management system standard formulated by the International Organization for Standardization (ISO)

A quality management system standard formulated by the International Organization for Standardization (ISO)

Mandatory standards set by EU legislation

Registration certification of the European Chemicals Agency (ECHA)

Global certification of social responsibility

HIGH HEAT FOOD PANS

The PPSU high-temperature food pan with handles is a professional kitchen utensil designed for efficient operation of fast-food chains. Its key advantages lie in high heat-resistance, impact-resistance, ease of operation, and compliance with safety regulations.

Superior heat resistance + hydrolysis resistance: capable of withstanding temperatures ranging from -40 to 190°C. Compatible with all leading manufacturers' commercial kitchens teamers and insulated containers (including single-sided mode and penetration mode) with dishwashers; no deformation or cracking.

Safety and compliance + no residues: Food-grade PPSU with no BPA, certified by organizations such as NSF/FDA, resistant to acids, bases, and oils. It does not harbor dirt or grime, meeting the hygiene standards of fast-food chains.

With a handle + easy to operate: Unibody, heat-resistant handle design ensures that it remains cool to the touch even when handled at high temperatures, reducing the risk of slipping and making it suitable for high-volume food service. Faster turn around times to reduce operational risks.

Transparent visibility + controllable costs: The transparent basin body makes it easy to quickly check the remaining quantity of ingredients, reducing the need to open the lid frequently. It is lighter than stainless steel. It is highly resistant to wear and tear over the long-term, resulting in lower overall operating costs.

STARTER UNITS

Units ship complete in 2 boxes: shelf plates & accessories in one, post kits & traverses in the other.

Starter unit size

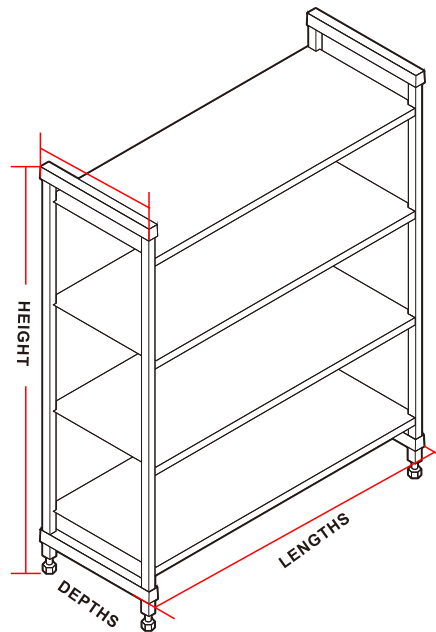

| DEPTHS (mm) | LENGTHS (mm) | | HEIGHT (mm) |
|-------------|--------------|-------------|-------------|
| 460 | 610 | 1220 | 1630 |
| 540 | 765 | 1375 | 1830 |
| 610 | 915 | 1525 | 2140 |
| | 1070 | 1830 | |

Standard mobile unit size

| DEPTHS (mm) | LENGTHS (mm) | | HEIGHT (mm) |
|-------------|--------------|-------------|-------------|
| 460 | 915 | 1375 | 1784 |
| 540 | 1070 | 1525 | 1987 |
| 610 | 1220 | 1830 | |

Under-table unit size

| DEPTHS (mm) | LENGTHS (mm) | HEIGHT (mm) |
|-------------|---------------------------|-------------|
| 460 | 915 1220 | 765 |

Weight bearing

The weight must be evenly distributed across the entire shelf.

| | | UNIT LENGTH | |
|--|----------------------------------|-------------|---------|
| | | 610 -1525MM | 1830 MM |
| SINGLE UNIT | Unit only | 1090 kg | 1090 kg |
| | Shelf only | 365 | 275 |
| | Unit with dunnage stand | 1270 | 1225 |
| | Bottom shelf with dunnage stand | 545 | 410 |
| | | UNIT LENGTH | |
| | | 610 -1525MM | |
| CORNER UNIT with 2 Dunnage stands required | Unit only | 1090 | |
| | Shelf only | 365 | |
| | Bottom shelf with dunnage stands | 545 | |
| | | UNIT LENGTH | |
| | | 610 -1525MM | |
| INTERMEDIATE UNIT with 2 Dunnage stands required | Unit only | 1090 | |
| | Shelf only | 365 | |
| | Bottom shelf with dunnage stands | 545 | |
| MOBILE UNIT | Unit only | 340 | |

Dunnage Stands add stability and increase weight bearing capacity on bottom shelf only. For use with shelves of any length. Highly recommended for Starter Units 1375mm and longer, all Corner Units, U-Shape Units and units specified for heavier loads.

Due to the weight bearing capacity of casters, maximum weight load on an entire Mobile Unit is 340KG.

SHELVING SERIES

Improve transportation efficiency.

Fast Transfer: Quickly move ingredients, seasonings, or semi-finished products between areas such as the kitchen, warehouse, and front hall to reduce the need for manual transportation multiple times.

Batch processing: Multi-level designs or large-capacity vehicles can transport large quantities of raw materials (such as vegetables, frozen goods, and seasonings) at once, saving time and labor.

Ensuring the hygiene and safety of food ingredients.

Categorical segregation: Use layered and compartmentalized designs (e.g., separate areas for raw and cooked foods, containers with lids) to prevent cross-contamination.

Temporary Storage: Store raw materials temporarily during peak meal preparation periods to prevent direct exposure to work surfaces or the ground.

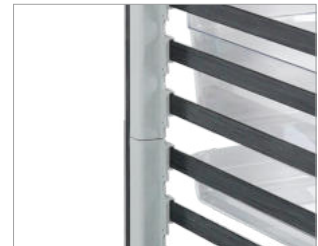

- The top features a specialized design that allows for the placement of a cutting board, thereby streamlining the process of preparing food.

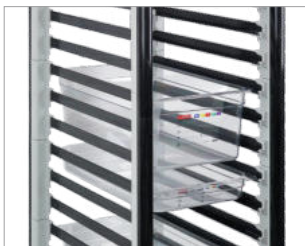

- never rust or corrode protection, durability, smooth surface that is easier to clean.

- (Gray areas) Made of Polypropylene, featuring rust and corrosion resistance, durability; smooth surface for cleaning easier.

- Available in various sizes, can be paired with food pans, trays, and dough boxes for use. Multi-layer design to maximize space efficiency.

- Plastic casters never rust or corrode, Quiet.

DOUGH BOXES

- Ideal for storing, transporting, proofing and cooling dough.
- Lightweight, durable, and break resistant.
- Chemical resistant material won't absorb odors and is easy to clean.

- Boxes nest tightly together to keep out dirt and contaminants, extending product freshness.
- Each box acts as a tight lid for the box below, reducing the need and expense of covers.
- Cover can be used as tray.

- Boxes won't bend or lose their shape.

Rustproof construction

Sturdy aluminum post

Lockable design for secure closure, preventing door self-opening.

Double-Layer Baffle for Flexible Food Arrangement

Never Rusts

Plastic castors, safe, durable, quiet and never rust.

BOXES

The material and design are made for the foodservice industry—where non-stop use and quick cleaning are must-haves!

1. Made of PE material and stands up to daily heavy use.
2. Easy to clean and carry—ideal for the fast-paced hustle of a busy kitchen.
